

FOOD QUALITY AND SAFETY POLICY

LAMONS SA veterinary pharmaceutical company has had a presence in the animal health and nutrition market for fifty years. Located in Lleida, Spain, LAMONS focuses its activities on the development, manufacturing, storage, and marketing of veterinary pharmaceutical products, including premixes, complementary feeds and complementary dietary feeds.

Our management team is conscious of the complex and constantly evolving nature of manufacturing animal nutrition products, as well as our customers' high expectations for quality.

Therefore, it is our desire that our organization becomes recognized by customers, suppliers, employees and society in general, in all its decisions and activities, as a company responsible and respectful of quality, food safety and the environment.

With this concern for improvement, Management establishes, declares and assumes the following commitments:

- To implement, maintain and improve a Food Safety and Environmental Management System that constitutes the driving force behind the Company's management.
- To strictly comply with legal and/or regulatory requirements, and any voluntary regulations to which it decides to adhere.
- To manufacture, store and market quality, safe, and environmentally friendly products.
- That the contractual requirements, wishes and expectations of clients are the criteria which guide our organization's actions.
- To maintain exhaustive traceability.
- To take the necessary measures to prevent fraud/adulteration.
- To promote a spirit of continuous improvement as the basis of daily work in all the activities of the organization, seeking the most efficient and effective solutions.
- To establish measurable objectives aligned annually with the guarantee of quality and safety of the products and services offered.
- To prioritize the Health and Safety of workers.
- To provide all the necessary resources to comply with this Policy to increase confidence in LAMONS.

LAMONS will ensure that this policy is publicly available so that any member of this organization, customer, supplier or third party can suggest improvements or detect deficiencies, all of which will be analyzed and addressed in the best possible way.

This Food Quality and Safety Policy has been adopted, disseminated, and implemented by all levels of the organization.
